

TSH
(Mouse monoclonal Antibody anti-human Thyroid Stimulating Hormone)

PRODUCT ANALYSIS SHEET

Cat 53.188.26

Clone:	2/3E1 2F12
Batch:	B15D3P1
Size	3 x 1 mg / 254 µl
Format:	Purified Unconjugated, Liquid
Concentration:	3.93 mg / ml in BBS 0.1M pH8.0
Preservative:	None
Purification:	Purified by Protein A affinity chromatography
Isotype:	IgG1 Kappa
Immunogen:	Human recombinant TSH
Mouse / fusion partners:	Balb/c (Charles River)/ NSO
Specificity :	Recognizes natural and recombinant Human TSH, epitope I ⁽¹⁾
Application:	RIA/ELISA as capture antibody
Storage & Stability:	4°C / 30.09.2025
Update:	November 15, 2011

1. Donadio S et al.
Both core and terminal glycosylation alter epitope expression in thyrotropin and introduce discordances in hormone measurements.
